

hp magneto- optical disks

up to
9.1 GB

write-once and rewritable disks that surpass industry standards

- Optimum compatibility with HP Surestore optical drives and with other optical drives meeting similar standards.
- HP Magneto-optical disks meet and surpass ISO, IEC and ANSI standards.
- Exceptional reliability and durability across the total optical solution (drives, the library and media) thanks to HP's patented robotics technology.
- Hewlett-Packard's quality control tests include 40,000 load/unload cycles per disk – which well exceeds industry standards. This minimises the risk of broken shutters and unrecoverable read problems.
- HP Magneto-optical disks are designed for customers using HP Surestore optical drives and jukeboxes, and other manufacturers' optical jukeboxes, in document management applications. They are of particular relevance to MIS managers of large enterprises who typically need to scan more than 15,000 pages a month.
- HP Rewritable optical disks allow virtually unlimited read/write cycles – ideal for data management in information-intensive environments.
- HP Write-once optical disks are designed for permanent storage of large volumes of data.
- Ideal for high-volume files – a 5.2 GB disk can store up to 1.3 million pages of text.
- Archival life of 100 years.
- Limited lifetime warranty.
